

QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR TELECOM INDUSTRY

What are Occupational Standards(OS)?

OS describe what individuals need to do, know and understand in order to carry out a particular job role or function

OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

Introduction Qualifications Pack- BroadBand Technician

SECTOR: TELECOM
SUB-SECTOR: Service Provider

OCCUPATION: CUSTOMER SERVICES

REFERENCE ID: TEL/Q0102

Brief Job Description: Broadband Technician is responsible for installation, configuration and testing of CPE (modem, routers and switches) for broadband access. He also establishes connectivity between CPE and end-user device (CPU, Laptop, tablets, Smart/IP TV etc.) at customer premises and carries out basic trouble-shooting for identifying, localizing & rectifying cable, connectivity and equipment fault in coordination with NOC.

Personal Attributes: Personal Attributes: This job requires the individual to have good communication skills with a clear diction; regional language proficiency; strong customer service focus; pleasant personality; should be self-motivated; should be able to apply practical judgment to successfully perform the assigned responsibilities and a team player with ability to work under pressure.

Job Role	Customer Premises Equipment		
Role Description	Broadband Technician is responsible for installation, configuration and testing of CPE (modem, routers, and switches) for broadband access. He also establishes connectivity between CPE and end-user device (CPU, Laptop, tablets, Smart/IP TV etc.) at customer premises and carries out basic trouble-shooting for identifying, localizing & rectifying cable, connectivity and equipment fault in coordination with NOC.		
NVEQF/NVQF level	4		
Minimum Educational Qualifications Maximum Educational Qualifications	10+2 / ITI (Electronics)		
Training	NA		
Experience	NA		
Applicable National Occupational Standards (NOS)	 (Click to open the below hyperlinks) Compulsory: <u>TEL/N0111 (Cable/system wiring and equipment installation at customer premises)</u> <u>TEL/N0112 (Configuration of equipment and establishing Broadband connectivity)</u> <u>TEL/N0113 (Trouble-shoot to localize and rectify faults)</u> <u>Optional:</u> <u>TEL/N0114 (UPS installation & Domestic Power Supply checks)</u> 		
Performance Criteria	As described in the relevant OS units		

Qualifications Pack For Customer Premises Equipment

Keywords /Terms	Description
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
Job Role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
OS	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
NOS	NOS are Occupational Standards which apply uniquely in the Indian context.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Qualifications Pack	Qualifications Pack comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Unit Code	Unit Code is a unique identifier for an Occupational Standard , which is denoted by an 'N'.
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
Organizational Context	Organizational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills or Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.

Qualifications Pack For Customer Premises Equipment

Keywords /Terms	Description
CPE	Customer Premise Equipment
IPv4	Internet Protocol version 4
IPv6	Internet Protocol version 6
Modem	Modulator/Demodulator
CPU	Central Processing Unit
РоР	Point of Presence
OHS	Organizational Health & Safety
EMI	Electro Magnetic Interference
EMC	Electro Magnetic Compatibility
JB	Junction Box
SHE	Safety Health & Environment
OHS	Operational Health & Safety
OFC	Optical Fiber Cable
STP	Shielded Twisted Pair
UTP	Un-Shielded Twisted Pair
MAC	Media Access Control
IP	Internet Protocol

System wiring and equipment installation at customer premises

National Occupational Standard

Overview

This unit is about cable/system wiring & installation of customer premises equipment (CPE).

TEL/N01	.11 Syste	em wiring and equipment installation at customer premises
, -	Unit Code	TEL/N0111
	Unit Title	
Ird	(Task)	System wiring & equipment installation at customer premises
anda	Description	This unit is about cable/system wiring & installation of customer premises equipment. Cables include OFC, UTP/STP and Co-axial.
National Occupational Standard	Scope	This unit/task covers the following:
tio		Identify and mark cable route from PoP to customer premise
pat		Identify and mark cable route within customer premise
cul		Identify suitable position for equipment positioning
0 0		Undertake wiring, termination and equipment installation
nal	Performance Criteria (F	PC) w.r.t. the Scope
atic	Element	Performance Criteria
Ž		To be competent, the user/individual on the job must be able to
		PC1. arrange access to site according to required procedure
		PC2. organize tools, equipment and materials for a given work
		PC3. match cable type and connectors to installation environment and customer
		requirements
	Prepare for wiring	PC4. check cable length for continuity
	and equipment	PC5. verify cable route is free of electrical hazards and obstructions both outdoors
	installation	and indoors
		PC6. verify that the cable running length is within the permissible limit to ensure
		designed throughput
		PC7. select suitable location for equipment installation wrt power point and signal
		coverage
		PC8. ensure structured wiring from PoP to Customer premise JB
		PC9. ensure neat wiring and clipping within customer premise
		PC10. ensure proper cable termination and use of appropriate connectors
	Undertake wiring &	PC11. test the cable & joints for transmission loss and strength. Re-terminate if loss
	Install system	exceeds prescribed limits
	hardware	PC12. install equipment following electrical safety principals and
		manufacturer's instructions
		PC13. power-up the system ensuring proper earthing arrangement
		PC14. removal and proper dispose of installation waste
	Clean up worksite	PC15. restore worksite to customer's satisfaction
	and complete documentation	PC16. update plans and records with details of installation and test results
	uocumentation	PC17. complete all installation documents and customer signoff

TEL/N0111 System wiring and equipment installation at customer premises Knowledge and Understanding (K) The user/individual on the job needs to know and understand: KA1. risk and impact of not following defined procedures/work instructions A. Organizational issued as per SHE & OSH guidelines. Context KA2. escalation matrix for reporting identified incidents, troubles and/ or (Knowledge of the emergencies e.g. system failures, fire and power failures company / KA3. records to be maintained and implications of non-maintenance of the same organization and its processes) KA4. knowledge of obtaining cables and equipment from company KA5. knowledge of payment options and procedures KA6. first aid requirements in case of electrical shocks, cuts, fall and other common injuries The user/individual on the job needs to know and understand: **B. Technical** KB1. cabling types (OFC, UTP, STP, Twisted Pair etc.) and connectors (RJ-45, RJ-Knowledge 11 etc.) KB2. structured cabling norms (pertaining to laying the cables) KB3. working knowledge of cable laying and connectorisation KB4. knowledge of customer premise equipment (modem, routers, switches) Skills (S) **Basic Reading & Writing Skills** The user/individual on the job needs to know and understand how to: SA1. fill up appropriate technical forms, activity logs in required format of the company SA2. maintain proper records as per given format SA3. read and understand manuals, work orders, health and safety instructions, A. Core Skills/ memos, reports etc. **Generic Skills Communication Skills** The user/individual on the job needs to know and understand how to: SA4. courteous to the customers SA5. liaisioning and coordination skills communicate with supervisor and peers SA6. SA7. communicate in the local language (preferable) Equipment installation/Task Management Skills The user/individual on the job needs to know and understand how to: SB1. select a suitable installation location adhering to cabling norms and signal coverage (for Wi-Fi equipment) **B.** Professional Skills SB2. work systematically with required attention to detail and adherence to all safety requirements **Technical Skills** The user/individual on the job needs to know and understand how to: read and comprehend/understand equipment installation manual SB3. SB4. perform fault clearance

Trouble-shoot to localize and rectify faults

National Occupational Standard

Overview

This unit is about trouble shooting to localize and rectify faults wrt cables, configuration, connectivity etc.

Trouble-shoot to localize and rectify faults

Unit Code	TEL/N0113
Unit Title (Task)	Trouble-shoot to localize and rectify faults
Description	This unit is about trouble shooting to localize and rectify faults
Scope	 This unit/task covers the following: Trouble shoot cable and connector faults Trouble shoot CPE (modem, router, switch) Trouble shoot configuration and connectivity issues between CPE & service provider gateway and between CPE & end user device Report and document fault, corrective action and the status
Performance Criteria (F	PC) w.r.t. the Scope
Element	Performance Criteria
Locate and trouble shoot cable & connector fault	 To be competent, the user/individual on the job must be able to PC1. differentiate between types of cables PC2. Identify correct cable pairs PC3. Undertake continuity check and localize fault distance
Troubleshoot CPE fault	 PC4. understand relevance of various indicative lights on the CPE PC5. connect CPE to laptop/CPU/portable device for fault diagnostic PC6. install CPE access software, if required PC7. access CPE through browser/software application and run diagnostic application PC8. decipher results to localize fault
Rectify the faults with cable, connectors and CPE	 PC9. carry out re-conectorization/crimping (of cable pairs with connector) or replace cable, if required PC10. re-configure the CPE to correct settings PC11. reset CPE, if required.
Complete documentation and clean up worksite	 PC12. record steps undertaken for fault localization/isolation PC13. record changes undertaken for fault rectification PC14. Restore any changes made to the worksite during fault repair to the client's satisfaction
Knowledge and Unders	standing (K)
A. Organizational Context (Knowledge of the company / organization and	 The user/individual on the job needs to know and understand: KA1. risk and impact of not following defined procedures/work instructions KA2. escalation matrix for reporting identified incidents, troubles and/ or emergencies e.g. system failures ,fire and power failures

UPS installation & Domestic Power Supply checks

National Occupational Standard

<u>Overview</u>

This unit is about undertaking power supply checks & UPS installation at service provider / customer premise.

UPS installation & Domestic Power Supply checks

Unit Code	TEL/N0114
Unit Title (Task)	UPS installation & Domestic Power Supply checks
Description	This unit is about undertaking power supply checks & UPS installation at service provider / customer premise.
Scope	 Use of voltage/current meters Power Supply checks at 5/15 Amp power socket Earthing checks Installation of UPS Routing of supply to equipment through UPS Precautions whilst handling live power supply Familiassrity with UPS (battery, charger etc.) Basic maintenance of AC
Performance Criteria	(PC) w.r.t. the Scope
Element	Performance Criteria
	To be competent, the user/individual on the job must be able to PC1. carry out voltage, current checks PC2. carry out earthing checks PC3. installation of ups PC4. routing of power supply through ups PC5. calculate equipment load vis-à-vis ups rating PC6. exercise precautions whilst handling power supplies PC7. UPS battery checks & replacement
Knowledge and Unde	rstanding (K)
 B. Organizational Context (Knowledge of the company / organization and its processes) 	The user/individual on the job needs to know and understand: KA1. UPS installation norms KA2. compliance to Voltage/Current norms KA3. UPS & compatible batteries KA4. the basic process for maintaining AC
B. Technical Knowledge	The user/individual on the job needs to know and understand:KB1.UPS & types of UPSKB2.power rating of UPSKB3.basic load calculations

L/N0114	UPS installation & Domestic Power Supply checks
	KB4. routing of power supply through UPS
	KB5. earth & continuity checks for power supply
	KB6. use of test equipment for checking/measuring power supply
	KB7. checks & replacement of UPS batteries
	· ·
Skills (S)	
	Reading Skills
	The user/ individual on the job needs to know and understand how to:
	SA1. i nstallation manual for UPS
	SA2. read and comprehend basic wiring disgrams
C. Core Skills/	
Generic Skills	
	Oral communication Skills
	The user/ individual on the job needs to know and understand how to:
	SA3. communicate the issue/fault to the customer
	SA4. communicate the issue/fault with complete details to the supervisor
	Analytical Skills
	The user/individual on the job needs to know and understand how to:
	SB1. analyse basic wiring diagrams to facilitate correct installation of UPS
	SB2. analyse house-hold circuits for correct installation of devices
	SB3. calculate equipment load and suggest UPS connection configuration
D. Professional Skills	SDS. Calculate equipment load and suggest of 5 connection comparation
	Disputies and Execution
	Planning and Execution
	The user/individual on the job needs to know and understand how to:
	SB1. plan installation/check activities
	SB2. carry out installation with minimum disturbance

UPS installation & Domestic Power Supply checks

Job Role

Qualification Pack

Sector Skill Council

BROADBAND TECHNICIAN

TEL/Q0102

: Telecom

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC

down proportion of marks for Theory and Skills Practical for each PC. 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.

3. Individual assessment agencies will create unique question papers for theory and skill practical part for each candidate at each examination/training center.

4. To pass the Qualification Pack , every trainee should score a minimum of 40% in every NOS and overall of 50%.

5. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

NOS	Element	PC	Total Mark (400)	ement Weig	Out of	Theory	Skills Practical
	Prepare for wiring and equipment installation	PC1. arrange access to site according to required procedure		40	5	5	0
		PC2. organize tools, equipment and materials for a given work			10	5	5
		PC3. match cable type and connectors to installation environment and customer requirements			5	0	5
		PC4. check cable length for continuity			5	0	5
		PC5. verify cable route is free of electrical hazards and obstructions both outdoors and indoors			5	0	5
		PC6. verify that the cable running length is within the permissible limit to ensure			5	0	5
		PC7. select suitable location for equipment installation wrt power point and signal coverage			5	5	0
		PC8. ensure structured wiring from PoP to Customer premise JB		40	10	10	0
1. TEL/N0111 (Cable/system wiring and equipment		PC9. ensure neat wiring and clipping within customer premise PC10. ensure proper cable termination and	100		5	5	0
installation at customer premises)	Undertake wiring & Install system hardware	use of appropriate connectors	100		5	5	0
		PC11. test the cable & joints for transmission loss and strength. Re-terminate if loss exceeds prescribed limits			5	0	5
		PC12. install equipment following electrical safety principals and manufacturer's instructions			10	0	10
		PC13. power-up the system ensuring proper earthing arrangement			5	0	5
	Clean up worksite and complete documentation	PC14. removal and proper dispose of installation waste		20	5	5	0
		PC15. restore worksite to customer's satisfaction			5	5	0
		PC16. update plans and records with details of installation and test results			5	5	0
		PC17. complete all installation documents and customer signoff			5	5	0
			Total		100	55	45
	Establishing connectivity with service provider gateway	PC1. connect up laptop/PC, Smart/IP TV and other appropriate device to the CPE (modem, router, switch) and establish connectivity	100 -	20 -	10	0	10
		PC2. access CPE setting using default login credentials			5	0	5
		PC3. configure CPE as per the base setting (IP, Gateway, Mask etc.)			5	0	5
		PC4. ensure all cables/connectors are			5	0	5
2. TEL/N0112 (Configuration		PC5. ping service provider gateway PC6. analyze test results for connectivity and throughput parameters		20	5 10	0 10	5 0
of equipment and establishing Broadband connectivity)	Establishing connectivity between CPE and end user device	PC7. configure end user device to establish LAN connectivity with the CPE		30	15	5	10
		PC8. ping CPE from end user device and analyze response			15	5	10

				i			
	Record configuration setting and testing steps for customer	PC9. record CPE configuration settings		30	10	10	0
		PC10. record end user device configuration			5	5	0
		PC11. record pinging procedure and expected result parameters			5	5	0
		PC12. brief customer on basic trouble-			10	0	10
		shooting steps/self-help	Total		100	40	60
		PC1. differentiate between types of cables	Total		5	5	0
			100	20	5	0	5
		PC3. Undertake continuity check and localize fault distance			5	Ū	5
					10	0	10
	Troubleshoot CPE fault	PC4. understand relevance of various indicative lights on the CPE		40	5	5	0
		PC5. connect CPE to laptop/CPU/portable device for fault diagnostic			5	0	5
3.TEL/N0113 (Trouble-shoot to localize and rectify faults)		PC6. install CPE access software, if required			10	0	10
		PC7. access CPE through browser/software application and run diagnostic application			10	0	10
		PC8. decipher results to localize fault			10	5	5
	Rectify the faults with cable, connectors and CPE	PC9. carry out re-conectorization/crimping (of cable pairs with connector) or replace cable, if required			5	0	5
		PC10. re-configure the CPE to correct settings			10	0	10
		PC11. reset CPE, if required.			5	5 0 40 5 0 0 5 0 5 0 0 0 5 0 0 5 0 0 0 5 0 0 0 5 0 0 0 0 0 0 0 0 0 0 0 0 0	5
	Complete documentation and clean up worksite	PC12. record steps undertaken for fault localization/isolation		20	10	10	0
		PC13. record changes undertaken for fault rectification			5	5	0
		PC14. Restore any changes made to the worksite during fault repair to the client's satisfaction			5	5	0
			Total		100	35	65
		PC1. carry out voltage, current checks	100		15	5	10
		PC2. carry out earthing checks		100	15		10
	Scope	PC3. installation of ups PC4. routing of power supply through ups			10 15		5
4. TEL/N0114 (UPS installation & Domestic Power Supply		PC5. calculate equipment load vis-à-vis ups					10
checks)		rating			15	15	0
		PC6. exercise precautions whilst handling power supplies			15		5
		PC7. UPS battery checks & replacement	Tatal		15		10
			Total		100	50	50
